

# Company Profile

QA and Testing

## **Elinext Company Overview**

## >27

Years in custom software development Development centers in Europe and Asia 700+

85% are software engineers

Clients worldwide

### Focus on specific domains:

Web & Mobile Apps

UI/UX Design

CRM & Customer Engagement

ERP & Asset Management

Cloud Computing & SaaS Development

DevOps

## **Quality Certified**

## Ensured by Elinext Management System:

Certified Quality Management Certified Information Security Management

## Proven by dedicated external audits:

- Code Review
- Static Analysis
- Dynamic analysis
- QA and unit-tests
- Continuous Integration
- Rules and processes

## Continuous competence development:

- Best-practice and knowledge sharing in onboarding process.
- Professional trainings, including external courses.
- Developer conferences and international hackathons

## Our QA teams adhere to industry best practices and standards, including:

ISO/IEC/IEEE 29119

## Zeroing in on QA Experience

### **Methodologies** we have mastered

- Scrum
- Kanban
- Waterfall
- Iterative V-model

Spiral

•

٠

### Domains we serve

In addition to solid technical background, our QA engineers have profound domain understanding to help clients solve their industry-specific challenges across:

- Healthcare
- Finances
- Manufacturing
- Telecom

- Insurance
- Education •
- Logistics
- eCommerce

- Media
- Sports
- Gaming
- Others

### **Application types** we test

- Web
- Mobile
- Desktop
- API

## **QA and Testing Tools**

#### Databases

## **QA and Testing Tools**

## **Ensuring Your Solution Works as Intended**

Functional	🕂 Unit testing	+ Integration testing	+ Smoke testing
testing	+ Sanity testing	+ System testing	+ Regression testing
	+ User acceptance testing	+ API testing	+ Black\white-box testing
	+ Component testing	+ UI testing	

## Guaranteeing Optimal Performance and User Satisfaction

Non-functional	🕂 Load testing	+ Stress testing	+ Volume testing
testing	+ Security testing	+ Compatibility testing	+ Performance testing
	+ Reliability testing	+ Scalability testing	+ Recovery testing
	+ Usability testing	+ Localization testing	+ Compliance testing
	+ Portability testing		

## QA Value at Each Stage of SDLC

#### **Requirements analysis**

- Assessing requirements from the quality perspective to identify potential issues
- Ensuring that requirements are clear, unambiguous, and measurable
- Defining the testing strategy, release cycles, and the scope of QA activities

#### Design

- Supporting the UX team in their understanding of the existing functionality (especially for long-term projects)
- Identifying design aspects that might cause problems

#### Development

- Reviewing functionality and preparing test environment
- Collaborating with developers to prevent incorrect implementation
- Preparing draft test cases and checklists to accelerate the testing phase

#### Testing

- Writing and executing checklists or test cases
- Tracking project changes and updating test documentation
- Preparing an execution report with detailed description of acceptance criteria, tested functionality, used platforms and environments, etc.

#### Deployment

- PDC (Post Deployment Cases) testing to ensure all key features work as expected
- User acceptance testing
- Supporting the deployment process as a knowledge keeper

#### Maintenance

- Assisting the support team in investigating client reports and incidents
- Identifying the root cause of problems

## Why Elinext?

~~

End-to-end project involvement

We have experience working in highly regulated domains like healthcare and finance with maximum engagement of our QA experts at every stage. Unique testing skills

ٵ

Our QA engineers are not only equipped with the full gamut of standard testing skills, but they also have experience with niche use cases and cutting-edge technology like applications for industrial robots. Automated CI/CD

As early adopters of CI/CD, we utilize this approach to accelerate and improve reliability of automated tests while providing the development team with fast feedback.

{<u>}</u>

## **Proprietary Test Management System**

Drawing from our 2+ decades of QA expertise, we are developing an inhouse test management system that will provide clients with all relevant test documentation and comprehensive reports.

### Document Management System For Clinical Trials

This large-scale project is a modular software platform that allows life sciences companies to streamline the execution and commercialization of global clinical trials and collaborate on partnerships while reducing administrative burdens. Learn More ->

#### **Features**

- 25000+ test cases, 7000+ automated cases
- CI\CD for QA and production instances
- Automated PDC and UAT
- Integration testing for dozens of integrated external solutions
- 18+ production instances with different versions

SVN

• GIT • CAS

#### **Technologies**

- C#
- ANGULAR
- .NET
- EXTJS

#### A US-based healthcare provider

### **Healthcare** Data **Anonymization Platform**

The solution is a fully functional website and a remote UNIX-server. It enables healthcare organizations to guickly and easily apply a risk-based responsible deidentification methodology. It ensures individual privacy and legal compliance while process management and automatization.

Learn More ->

#### **Features**

- Manual and automated QA
- UI migration
- Cross platform testing
- Visualization when controlling data processing
- UNIX processes management using GUI

JUNIT

• Detailed reports to customer and Data partners

#### **Technologies**

- JAVA
- SPRING
- MYSQL
- HIBERNATE APACHE

#### A Canadian healthcare company

### Global Payroll Management Software

The Elinext team is working on the MVP for a SaaS-based payroll management solution. The solution leverages two data processing systems (in Frankfurt and Beijing), mirroring each other to enable data exchange between two jurisdictions. Learn More ->

#### **Features**

- The Overview module with key information about the account
- The Organization module for configuring the company structure.
- The Payroll module that enables payroll activation for employees
- The Calendar module with all the dates related to payroll

Dashboards and reporting

#### **Technologies**

- NEST.JS
- REDUX
- NODE.JS
- REACT.JS

### B2B Online Payment Platform

When the client hit a major project roadblock with the previous vendor, Elinext came to the rescue. After architecture re-writing, refactoring and feature enhancement, we delivered a fullyfunctional online payment solution, tested from end to end by our QA experts. Learn More ->

#### **Features**

- A customizable widget that can be integrated with a website/mobile app
- An admin portal that generates access tokens
- Supporting Mastercard, Visa, Paypal, Klarna, SEPA, etc.
- Accepting payments in 10 currencies
- Automated recurring payments
- Compliance with PCI and GDPR

#### **Technologies**

- NEST.JS
- AWS
- NODE.JS
- REACT.JS
- REACT NATIVEDYNAMODB

### Financial Risk Management Software

The Elinext team delivered a complex financial risk management system consisting of two apps - one for calculating multi-currency-associated risks and the other for pinpointing the real cost of loans and assets over time.

<u>Learn More -></u>

#### **Features**

- Company and entity setup
- Hedge accounting dashboard
- Hedge item and trade management
- Role-based access controls
- Regular and RTZ reports
- Period close module

#### **Technologies**

- HIBERNATE
- TOMCAT
- JAVA
- GWT/GXT
- SPRING
- MONGODBANGULAR JSIBATIS
- POSTGRESQL
- REST WEB SERVICES

A business analytics company based in Silicon Valley

### ESG Software For Employees

The project is an ESG solution that consists of a web app and a mobile app, and serves a channel through which employees can systematically signal to their employers how they feel about their workplace.

#### <u>Learn More -></u>

#### **Features**

- The employee module with surveys
- The employer module with reports and configurations
- Social score dashboard that tracks various workplace aspects like the environment, governance, work hours, pay, safety and more
- Compliance reward system

#### **Technologies**

- JAVA
- SPRING
- SYNCFUSIONANGULAR
- FLEXMONSTER

### Contract Management Software For Bond Trading

With 22 people on board, the Elinext team delivered a high-performing solution with complex architecture that automates contracts creation and allows multiple parties to collaborate on finalizing them. Learn More ->

#### **Features**

- Template module for managing templates and questionnaires
- Contracts and Documents module to convert questionnaires into documents
- Collaboration module to enable
   multiple users to work together
- Management module for setting up user roles and permission

#### **Technologies**

- SELENIUM
- MAILGUN
- JAVA
- C++
- JQUERY

REACTJENKINS

PHP

• MARIADB

LARAVEL

#### A Luxembourg-based startup

### Cash And Liquidity Management App

Developing a solution for managing and monitoring short-term funding requirements based on transaction history. Our senior BA worked closely with the stakeholders to translate highlevel financial requirements into detailed technical specs. Learn More ->

#### **Features**

• Consolidating financial transactions from internal and external sources

A admin admin

- Running a comprehensive stress scenario
- Compliance with the BCBS 248 intraday liquidity management framework
- Microservices-based architecture

ANGULARMONGODB

POSTGRESQL

#### **Technologies**

- JAVA
- SPRING
- KUBERNETES
- PROMETHEUS

### Remote Network And Router Management Platform

The project is a software platform for seamless subscriber management and end-to-end network visibility. It consists of a website, a set of analytics tools and a command-line interface. The system processes around 1,000,000 payloads from 1,000,000 routers per second. Learn More ->

#### Features

- Microservices-based architecture to support huge data throughput and scalability
- Cloud adapters for routers (CPE) and firmware
- Real-time analytics
- Compliance with
   telecommunication standards

#### **Technologies**

• GO

- SPRING
   AWS S3
- KUBERNETES
- JAVA
- KOTLIN
- POSTGRESQL
- PYTHONMONGODB

REACT

A Danish-American telecommunication software provider

### Mobile App for Electric Vehicles Charging Solution

The client engaged Elinext to develop a fully-featured iOS-based mobile app to simplify the charging process for the owners of green cars. The project also included a web app for telemetry.

<u>Learn More -></u>

#### **Features**

- Device management
- Controls and charge restrictions
- The device's status
- Options to choose a specific current strength
- Total energy and charging duration
- Power and voltage per phase
- Charging history

#### **Technologies**

- KOTLIN
- SWIFT
- FOUNDATION
   RETROFIT
- UIKIT
- TEAMCITY

SNAPKIT

COCOALUMBERJACK

A Switzerland-based company that specializes in creating innovative EV charging solutions

### CI/CD Optimization And Automation

Working with a wide range of infrastructure solutions, the client tasked the Elinext team with developing an automated and easy-tomaintain CI/CD pipeline. The resulting solution has led to reducing the development by 40%. Learn More ->

#### Features

- CI/CD pipeline customization according to project needs
- Fast and easy components configuration
- The ability to skip certain build stages

#### **Technologies**

- JENKINS
- GROOVY

A global technology company that delivers infrastructure management solutions

## Elinext CV Manager

An internal applicant tracking system that brings visibility into the recruitment pipeline, facilitates efficient management of candidates and vacancies, and accelerates the hiring process.

Learn More ->

#### **Features**

- Candidate management including resume upload and download, comments and status tracking
- Vacancy management including candidates assessment and advanced search.
- Comprehensive user management
- In-app reminders and email notifications

#### **Technologies**

• C#

- ASP.NETMSSQL
- ANGULAR

## Solutions We Deliver

## **Cooperation Models**

### **Fixed Cost**

- To freeze project costs having a very detailed scope of work and schedule
- To avoid investing too much time in budget control and project tracking
- To develop an MVP or a smallscale product under \$50,000 USD
- To have a high level of predictability

### Time and Materials

- To be agile and adapt quickly your product to the market demand and internal needs
- To control the project costs and progress but it is difficult to define upfront scope, schedule and scope outlines
- To decrease costs by saving money calculated by the IT vendor for possible project risks

### **Dedicated Team**

- To extend your team's capacity
- To add specific knowledge or skills to your team
- To speed up your development process quickly
- To rely on the vendor's dev team as if it was sitting in our office

## Quality Delivered by the Team (Agile Model)

#### Discovery and Design phase

- Team setup
- Plan and prepare
- Refine requirements (Functional and Non-Functional)

- Design
- Architecture
- Infrastructure
- Product backlog

## Development – 1 sprint (1-2 weeks) – recurring till the final delivery

- Sprint backlog and planning
- Feature(s)
- "Ready for Release"

- Sprint backlog and planning
- Feature(s)
- "Ready for Release"

### Initial Analysis of requirements, planning, UI/UX Design (1-4 sprints):

- Proof features and their priority by value and complexity
- Design a truly flexible and future-proof solution
- Plan an effective communication model
- Ensure further possibility to develop several services/ features in parallel

## Let's set up a powerful collaboration!
